

Deterioro de la reserva cardiovascular como marcador de la fragilidad

Grupo 3

2 de septiembre de 2005

Deterioro de la reserva cardiovascular

Puntos a discutir

- Reserva cardiovascular
- Criterio de deterioro de la reserva
- Cuando se vuelve marcador de fragilidad con los criterios de Fried.
- Medición de la reserva.
- Incidencia en la mortalidad

Deterioro de la reserva cardiovascular

Clinical Manifestations of Frailty

- *Consensus of Working Groups -*

- Sarcopenia: loss of muscle mass
- Weight loss/undernutrition
- Decreased strength, exercise tolerance
- Slowed motor processing, performance
- Decreased balance
- Low physical activity
- Cognitive vulnerability?
- Increased vulnerability to stressors

Deterioro de la reserva cardiovascular

Formalized phenotype: definition and validation of the clinical syndrome of frailty

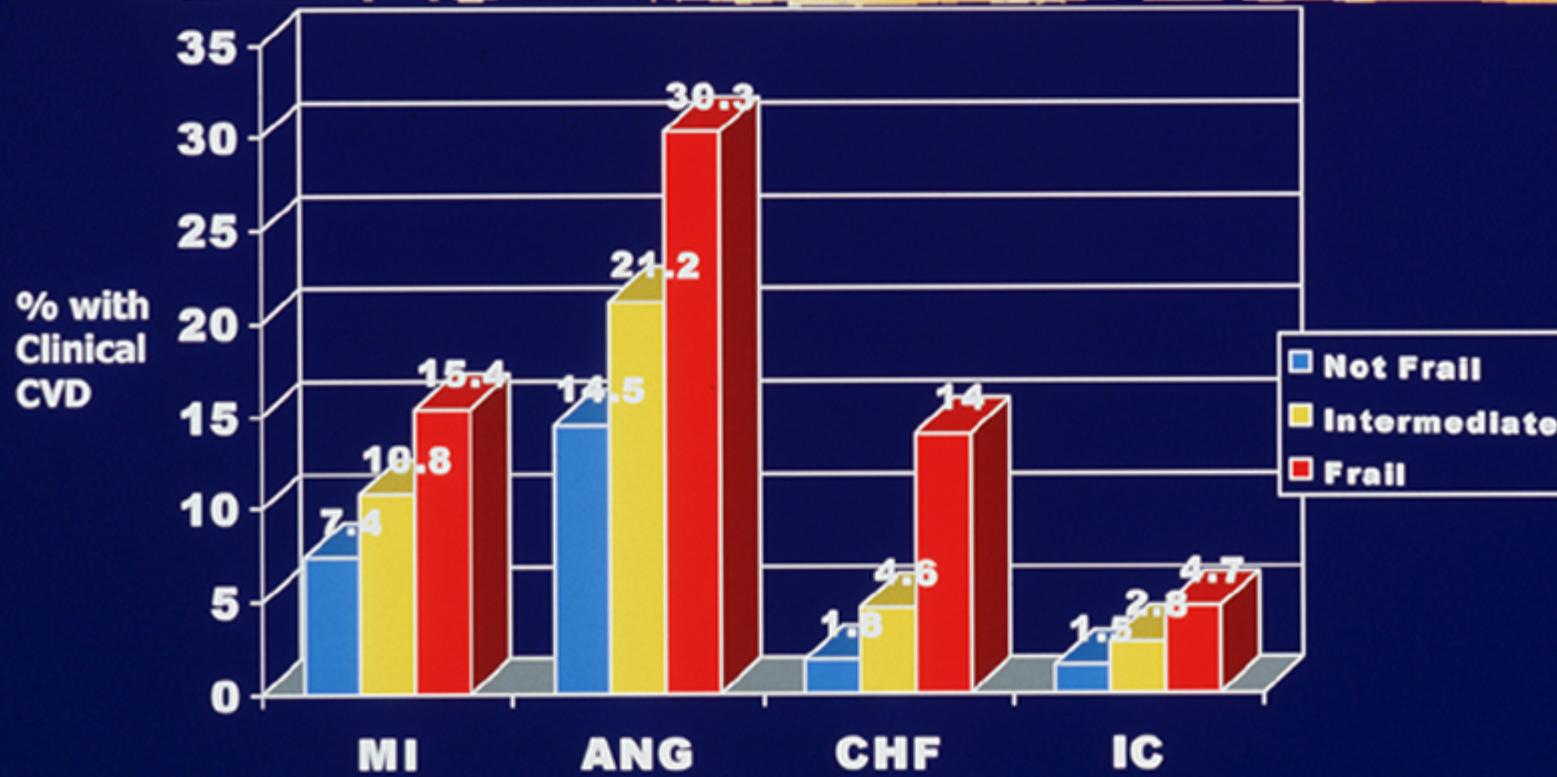

Multiple (3-5/5) criteria present:

- Weight loss
- Weakness
- Exhaustion
- Slowed walking speed
- Low activity

Fried, Tangen, Walston, Newman, Tracy, et al, J
Ger Med Sci, 2001

Deterioro de la reserva cardiovascular

Prevalence of Clinical CVD with Frailty

All p<.001, adjusted for age, gender and race

Deterioro de la reserva cardiovascular

Relationship of Clinical CVD to Frailty

Clinical CVD,
n=1030

Frail, n= 299

Overall p<.001,
adjusted for age,
gender and race

**La reserva cardiovascular SI es
un marcador de fragilidad en el
Adulto Mayor**
